**4.Recommendations**

**5.Bugs Report**

## **1.Purpose**

This document presents the tests that have been done on the Website “Wobi”.

The tests were carried out on the main functions of the site, which refer to operations such as: registration, possibility compareing prices all among companies at different insurances, customer service, links and more.

## **2.Testing Scope**

The main goal is to perform all the tests to cover and find bugs.

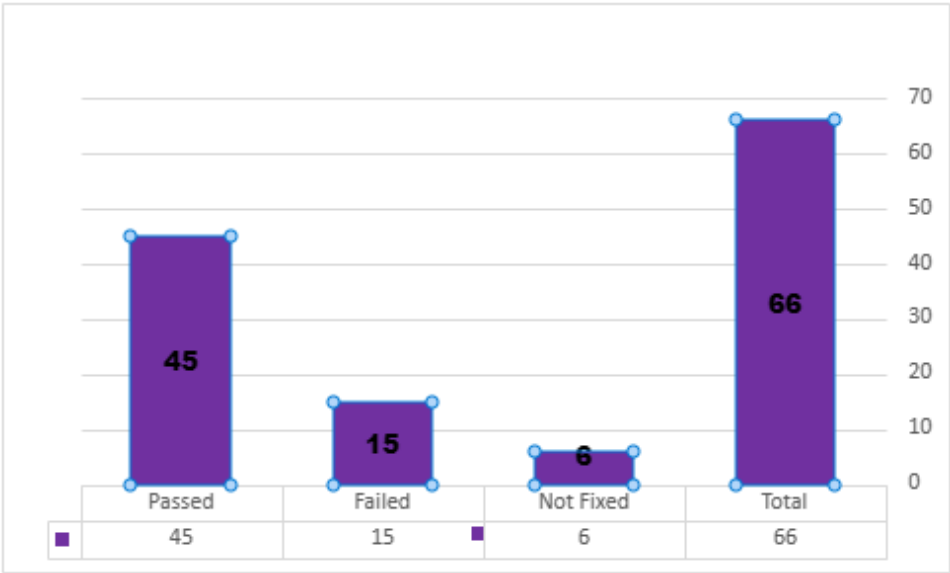

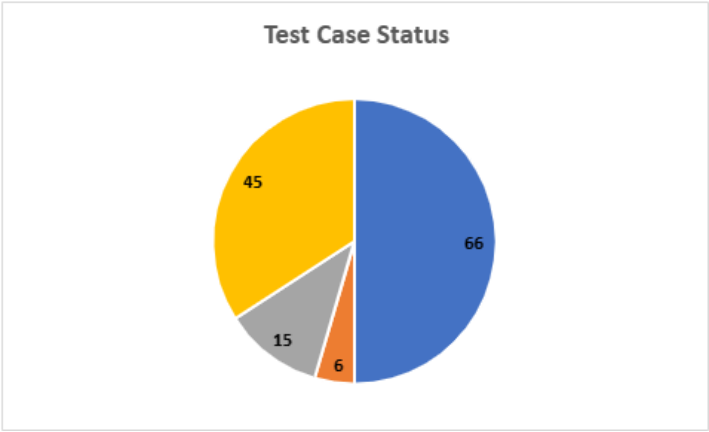

First define the scope functional testing which involves validating that software function as independent, identify the non-functional aspects that are tested such as usability, compatibility and reliability.

As well there was another testing such as, accessibility testing it turns out that it's in a level AA, and also has been tested a GUI testing that shows most of the bugs has been found on these specify tests.

3.Metrics

Test Cases

Passed	Failed	Not Fixed	Total
45	15	6	66

## 4.Recommendation

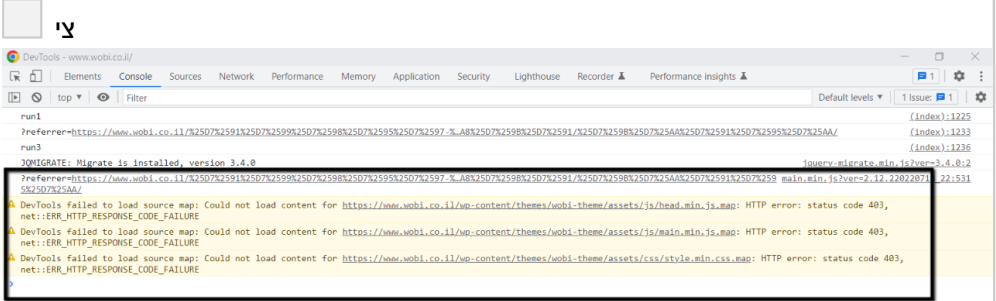

1. To have a option in the companies menu that you could see them with the arrow signs (and not slide with pc mouse).
2. To make the Website with less powerful color, and less contrast.
3. To make a page in LinkedIn (like you have in Facebook and Youtube).

## 5.Bugs Report

**[WOBI-7]** [There is a few failures in DevTools that cannot load source map](#) Created: 02/May/23 Updated: 02/May/23

The screenshot shows the Wobi website with a diagram illustrating a business process flow. The flow starts with 'ביטוח נסיעות לחו"ל' (Travel Insurance) and 'ביטוח רכב' (Car Insurance), leading to 'טיפול טיפוס' (Processing) and 'כדאי לדעת טיפוס' (Things to know). The 'טיפול טיפוס' section is highlighted with a red box, indicating a vulnerability. The diagram shows a flow from 'ביטוח נסיעות לחו"ל' to 'טיפול טיפוס' and then to 'כדאי לדעת טיפוס'.
